AUTHOR: Volfman, S.E., Engineer. 342

TITLE: System of automatic control of the process of combustion for "DKV" type boilers with pneumatic-mechanical dispensers (Systemu avtomaticheskogo regulirovaniya protsessa goreniya dlya kotlov tipa DKV s pnevmomekhanicheskimi zabrasyvatel'nyami.)

PERIODICAL: "Energomashinostroenie" (Power Machinery Construction), 1957, No. 3, p. 6, (U.S.S.R.)

ABSTRACT: The system is intended for automatic control of the supply of fuel and air and of the draught enabling the maintaining of the specified values of the pressure, fuel to air ratio and the sub-pressure in the combustion space. As auxiliary sources of energy for the regulators, 110 V d.c. and water of 1 - 3 atm. pressure at 50 °C are used. When all the regulators operate simultaneously, their consumption does not exceed 25 W; the water consumption of the system is 100 - 300 litres/hour. The equipment is manufactured by the "Ilmarine" Works. Experiments carried out in 1956 yielded satisfactory results. (This is not an abstract, but an almost complete translation.)

TITLE: Industrial Lighting (Osveshcheniye promyshlennyykh predpriyatiy)

PERIODICAL: Promyshlennaya Energetika, 1958, Vol.13, No.4, pp. 30 - 2 (USSR)..

ABSTRACT: This is a general review of foreign industrial lighting practice. High levels of illumination are used; those accepted in the USA and a number of European countries are given in Table 1. Table 2 gives data on the rising standards of illumination in France over the period 1910-1957. In England, tests have been made under factory conditions to determine the increase in labour productivity with increased illumination; the results are displayed in Table 3. Information about the main categories of light sources used for industrial lighting are given in Table 4; much use is made of incandescent and fluorescent lamps. The characteristics of the latter are described. The use of mercury-vapour lamps, particularly of the high-pressure type, is described. Projection equipment used in shipbuilding to project drawings on to steel sheet is depicted in Fig.1. Projection equipment is also used on a form-grinding machine, as in Fig.2. Sodium lamps are very efficient, but because of their colour characteristics

Card1/2

TITLE: A Radioactive Level Gauge (Radioaktivnyy urovnemer)

PERIODICAL: Pronyshlennaya Energetika, 1958, Nr 12, pp 28-29 (USSR)

ABSTRACT: This brief note is based on an article in "Process Control and Automation" 1957, Nr 9. It is often difficult to measure the level of materials in high pressure and certain other tanks. In such cases level gauges can be made to operate on the absorption of gamma radiation by the material in the container. Such a level gauge will consist of a radio-active source on one side of the tank and a gamma-radiation detector installed on the other. The advantages and disadvantages of this type of level gauge are briefly described. An example is given of the use of the instrument in a glass works. There is 1 English reference.

VOL'FKOVICH, Ya.Ye., inzh.

Design of an experimental section of a 750 kv. power line in  
the U.S.A. Energokhoz.za ruh. no.1:35-37 Ja-F '59.

(MIRA 12:4)

(United States--Electric power distribution--High tension)

VOL'PKOVICH, Ya.Ye., inzh.

Using grounding rapid-action circuit breakers for the protection of substations (from "Electrical World," no. 17, 1957).  
Energokhoz.za rub. no.1:40-41 Ja-F '59. (MIRA 12:4)  
(United States--Electric circuit breakers)

SECRET, Y. Y. . .

... .. no. 4:50-52 51- ... ..  
(1. 1. 1.)

(Electric ... ..)

VOL'FKOVICH, Ya.Ye., inzh.

Use of radar in the building of electric power transmission  
lines. Energokhoz. za rub. no.6:41-42 N-D '66. (MIRA 14:3)  
(United States -- Electric lines--Overhead)

VOL'FKOVICH, Ya. Ya.

Use of thermistors for the protection of electric motors. (from  
"Westinghouse Engineer" no.6, 1959). Prom. energ. 15 no.12:46  
D '60. (MIRA 13:12)  
(United States—Electric motors) (Thermistors)

VOL'FKOVICH, Ya.Ye.

Detection of defects in machines by means of a defectophone (from  
"Power Engineering" no.7, 1959). Prom. energ. 15 no.12:48 D '60.  
(MIRA 13:12)

(United States--Electric machinery)

VOZ'FKOVICH, Ya.Ye.

Utilization of magnetic rubber for the conveying of blanks (from  
"Plant Engineering," no. 5, 1958). Prom. energ. 14 no.1:53 Ja '59.  
(MIRA 12:1)

(United States--Conveying machinery)

VOL'FKOVICH, Ya.Ye., inzh.

Controlling ice on electric power transmission lines. *Energokhoz. za*  
rub. no. 6:44 N-D '59. (MIRA 13:3)  
(United States--Electric lines--Overhead)

VOL. 10013H, N. 1001, 1001.

See also Vol. 10013H, N. 1001, 1001. (APR 19:11)  
no. 1001, no. 1001, 1001.  
(Electric transformers) (Electric networks)

VOL'KOVICH, Ya.Ye.

Utilization of heating by infrared rays in industry (from "Elektrizit-  
tatsverwertung," no. 1, 1958). Prom.energ. 14 no.3:47-48 Mr '59.  
(MIRA 12:4)

(Infrared rays--Industrial applications)

VOL'FKOVICH, Ya.Ye.

Injuries from electricity in Austria from 1955 through 1957  
(from "Elektrotechnik und Maschinenbau," no.11, 1959). Prom.  
energ. 16 no.2:44-46 F '61. (MIRA 14:3)  
(Austria—Electricity, Injuries from)

VOL'FKOVICH, Ya.Ye.

Programmed control of bridge cranes (from "Electronics," Eng. Ed.,  
no. 1, 1958). Prom.energ. 14 no.3:48-49 Mr '59. (MIRA 12:4)  
(Electric cranes)  
(Automatic control)

VOL'EKOVICH, Ya.Ye.

Covered trolley wires for cranes (from "ASEA Journal," no.4-5, 1958).  
Prom.energ. 14 no.3:49-50 Mr '59. (MIRA 12:4)  
(Electric cranes)  
(Electric current collectors)

VOL'KOVICH, Ya.Ye.

Tubes for the inspection of inaccessible spots (from "Power," no. 10,  
1957). Prom.energ. 14 no.3:49 Mr '59. (MIRA 12:4)  
(Optical instruments)

VOL'KOVICH, Ya.Ye.

Protecting the bearings of electric motors from damage (from "Electrical Times," 1958). Prom.energ. 14 no.3:50 Mr '59. (MIRA 12:4)  
(Bearings (Machinery)) (Electric motors)

VOL'FKOVICH, Ya.Ye., inzh.

Automatic control of fuel feed by means of electronic apparatus.  
EnergoKhoz. za rub. no.2:42-43 Mr-Ap '60. (MIRA 13:6)

(Automatic control)

(United States--Electric power plants)

VOL'FKOVICH, Ya.Ye.

Lighting systems in industrial plants. Prom.enarg. 15 no.3:  
49-50 Mr '60. (MIRA 13:6)  
(Electric lamps, Incandescent)

-VOL'FKOVICH, Ya.Ya.

Electric heating of rooms by cables and wires laid in the floor.  
Prom.energ. 15 no.3:47-49 Mr '60. (MIRA 13:6)  
(Electric heating)

VOL'FKOVICH, Ya.Ye.

Electrochemical method of processing metals (from  
"Mechanical Engineering", no.10, 1958). Prom.energ. 15  
no.5:58 My '60. (MIRA 13:7)  
(Electric metal cutting)
